Mr. Wei's Chinese Class

Phase 3 & Phase 4: Intermediate Logic for Khaopan

Welcome back, Khaopan! You have successfully installed the Pronunciation Engine and Core Grammar. Now, we will learn how Chinese characters are constructed like modules in a program, and how to express Time and Location.

Phase 3: Radicals & Character Building Blocks

Lesson 7: The Logic of Radicals

Chinese characters are not random drawings. They are made of smaller building blocks called **Radicals**. Radicals usually give you a hint about the *meaning* of the word. Since you build systems, think of radicals as "class tags".

Radical	Meaning	Example Character	Pinyin & Meaning
氵	Water	喝 (hē)	To drink (Needs water!)
亻	Person	你 (nǐ)	You (A person)
讠	Speech	语 (yǔ)	Language / Speech
木	Wood/Tree	桌 (zhuō)	Table (Made of wood)

Workbook 7: Radical Recognition

Answer the following 8 questions.

1. What does the radical 氵 represent?
2. If a character has the 讠 radical, what is it likely related to?
3. What is the radical for "Person"?
4. Which of these characters likely means "Sea" or "Ocean"? (A. 林 B. 海 C. 休)
5. Translate *hē* to English.
6. What is the Pinyin for "You"?
7. Translate 语 (*yǔ*) to English.
8. True or False: Radicals help you guess the meaning of a character.

Answers: 1. Water | 2. Speech/Language | 3. 亻 | 4. B (海 - Notice the water radical) | 5. To drink | 6. nǐ | 7. Language / Speech | 8. True

Lesson 8: Adding "Where" (Location)

In Chinese, the location where an action happens must come **BEFORE** the verb. We use the word 在 (***zài***), which means "at / in / on".

Blueprint: Subject + 在 (zài) + Location + Verb + Object

Location Noun	Pinyin	Meaning
家	*jiā*	Home
学校	*xué xiào*	School
商店	*shāng diàn*	Store / Shop

Example: I read a book at home.
Logic: I (at) home read book.
Chinese: 我在家看书。 *(wǒ zài jiā kàn shū.)*

Workbook 8: Location Protocol

1. Does the location come BEFORE or AFTER the verb in Chinese?
2. What word means "at/in/on"?
3. Translate to English: **他在学校。** (*tā zài xué xiào.*)
4. Translate to Pinyin: "Home"
5. Sentence Scramble: **水 / 喝 / 在家 / 我** (Rearrange to "I drink water at home")
6. Translate to Chinese characters: "Store/Shop"
7. Translate to English: **你在学校吃苹果吗？**
8. Fill in the blank: *wǒ ___ xué xiào kàn shū.* (I read at school).

Answers: 1. BEFORE | 2. 在 (zài) | 3. He is at school. | 4. jiā | 5. 我在家喝水。 | 6. 商店 | 7. Do you eat apples at school? | 8. zài

Phase 4: Everyday & Technical Vocabulary

Lesson 9: The Timeline (Time Words)

Just like Location, Time words also come **BEFORE** the verb. You can place the time either at the very beginning of the sentence or right after the subject.

Time Word	Pinyin	Meaning
今天	*jīn tiān*	Today
明天	*míng tiān*	Tomorrow
点	*diǎn*	O'clock (e.g., 8 O'clock = **八点** bā diǎn)

Example: Today I drink water. = **今天我喝水。** *(jīn tiān wǒ hē shuǐ.)*

Example: I read a book at 8 o'clock. = **我八点看书。** *(wǒ bā diǎn kàn shū.)*

Workbook 9: Time Management

1. Translate to English: **今天** (*jīn tiān*)
2. Translate to Pinyin: Tomorrow
3. How do you say "3 o'clock"? (Use the number 3 + diǎn)
4. Translate to English: **明天我在家。** (*míng tiān wǒ zài jiā.*)
5. Sentence Scramble: **看书 / 我 / 八点** (I read at 8 o'clock)
6. True or False: Time words go at the very end of a Chinese sentence.
7. Translate to Chinese: Today I eat an apple.
8. Match: "diǎn" means (A. Day, B. Tomorrow, C. O'clock).

Answers: 1. Today | 2. míng tiān | 3. 三点 (sān diǎn) | 4. Tomorrow I am at home. | 5. 我八点看书。 | 6. False (They go before the verb). | 7. 今天我吃苹果。 | 8. C (O'clock)

Lesson 10: Tech Nouns & Action Verbs

Chinese words are highly logical. For example, a computer is an "electric brain" and a phone is a "hand machine"!

Vocabulary	Pinyin	Literal Translation	Meaning
电脑	*diàn nǎo*	Electric Brain	Computer
手机	*shǒu jī*	Hand Machine	Mobile Phone
做	*zuò*	N/A	To do / To make
买	*mǎi*	N/A	To buy

Master Blueprint Example: Time + Subject + Location + Verb + Object

Tomorrow, I buy a computer at the store.

明天，我在商店买电脑。 *(míng tiān, wǒ zài shāng diàn mǎi diàn nǎo.)*

Workbook 10: Final Compilation

1. What does **电脑** (*diàn nǎo*) literally translate to?
2. Translate to English: **手机** (*shǒu jī*)
3. What is the verb for "to buy"?
4. Translate to English: **我做电脑。** (*wǒ zuò diàn nǎo.*)
5. Sentence Scramble: **买 / 手机 / 他 / 在商店** (He buys a phone at the store)
6. Translate to Pinyin: "To do / To make"
7. Translate to Chinese: Today I am at home.
8. What particle turns **你买手机。** into a question?

Answers: 1. Electric Brain | 2. Mobile Phone | 3. 买 (mǎi) | 4. I make computers. | 5. 他在商店买手机。 | 6. zuò | 7. 今天我在家。 | 8. 吗 (ma)

Congratulations on completing Phase 3 & 4! You are officially writing logical Chinese algorithms.
